Ericsson Nikola Tesla achievements (2008)

- Participation on all project meetings except the meeting in Vasteras
- Participation on the coneference ICSE 2008 – SEESE workshop, Leipzig, Germany, 2008-05-14 with the presentation: "Software engineering practice and expectations in software industry environment"
- Organizing Summer Camp with the students from FER (33) and FESB (5) (total 38 students) in duration of 5 weeks
  - 2 topics with direct connection for SE (6 students)
    - Component based development (4)
    - Software automated testing (2)
  - 5 topics with development of application according to industrial standards (12 students)
  - All of them used industrial proposed SE methods and procedures (from idea to prototype application)
- Prototype activities
  - Component based software development
  - Open source development paradigm
- Interconnection with other activities regarding SE (EU FP7, UKF)

Plans

- Continuation with started activities in Summer Camp regarding component based software development and investigation of interaction with existing code base/systems

- Continuation with open source paradigm investigation

- Prototype activities

- Croatian SE "virtual lab" creation support
  - Basic status of SE in Croatia
  - Educational initiatives at University level
  - Research initiatives
  - Industrial experience (best practice exchange – embedded systems, enterprise systems, ...)
  - Experts and knowledge base
